WID version 2.6.1 Addenda:

Date	Description	Comment
10/16/2015	Add value "P"="Professional" to creditcd table	New value found in last empdb

9/30/15	Periodtype – clarification of field values:
	    10 – ACS 1-year estimates
	    36 – ACS 3-year estimates
	    60 – ACS 5-year estimates
		No values changed, just a clarification of what the code means. Note that for all of these, period = 00 is used.

9/27/2015	Add new areatype 40 = MSA 2010	
9/27/2015	Add new incsource 4 = ACS	ACS is producing income data.

WID version 2.6.1 Errata:

Date	Description	Comment
9/30/2015	Change Load Order (Appendix A) to load occtypes table before the censcodes table. Move occtypes to #13, shifting everything afterwards by one.	
11/24/15	jvs table – the wage fields (medianwage, meanwage, minwage, and maxwage) need to be larger to hold wage data, and should be type numeric(9,2)	Increased to accommodate both hourly and annual wages.
